A2Z Consultancy

We are a full-service design and consulting firm specializing in **A-to-Z** solutions for your business to excel. With a team of experienced professionals and a commitment to continuous improvement, we are dedicated to helping our clients achieve success.

Customer service, collaboration and data driven solutions are at the heart of all our work and we pride ourselves in delivering it.

IT solutions

Enhancing visibility

- Operations andons
- Electronic teamboards
- KPI establishment
- Reporting network
- Visual management
- 5S Principles
- Yard management
- Stock integrity solutions
- Personnel visibility

Operation andons / Electronic teamboards

There are many ways to use the Andon system in Lean manufacturing and in several other industries. Regardless of where it's being used, the only way Andon works is if you truly empower operators to use it. This means giving operators not only the permission, but the obligation to stop their process when issues arise. Andon needs to be created in a simply and quick to read format and can be implemented to different areas of your business.

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about andons

What A2Z can do for you...

- Create your own designed andonds
- Develop electronic teamboards
- Implement customized matrix
- Provide easy accessibility
- Add multi informational level
- Quick guides for users
- Support button / Q&A

Benefits of operation andons:

- Quicker operational response
- Better problem visibility
- Digitalization of issue areas
- Pattern analysis
- Decision making support
- Remote access
- Real-time data

KPI establishment and reporting network

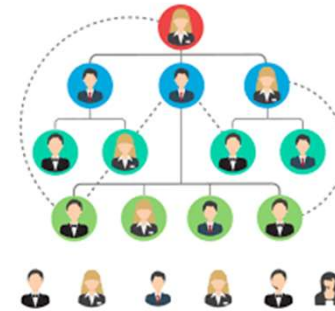

Key Performance Indicators are measurable values that show the effectiveness of a company's business objectives. Reporting is essential to monitor business performance over any period of time. It enables you to make better business decisions, project future results and drive improvements.

What A2Z can do for you...

- KPI development based on your business requirements
- Department and level based KPI's
- Connectivity to your software
- SMART data driven targets
- Development in your selected software and trainings for your personnel

Benefits of KPI reporting :

- Transparency around performance
- Accountability within the team
- Decision-making
- Target measurement
- Pattern analysis
- Integrated overview

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about KPI's

Visual management

Visual management is an absolutely essential tool within the world of Lean and can be seen as the link between the data and the people. Visual management uses instinctive visual cues to make succinct, accurate information within a workplace available at all times to those who need to know it.

What A2Z can do for you...

- Standardized naming conventions
- Floor / Rack markings
- Traffic organization
- Equipment markings (MHE, Dollies, Trolley...)
- Market organization
- Kanbans (MIN/MAX)
- NCM areas, First aid (HSE) zones ...

Benefits of visual management:

- Incidents reduction
- Increase stock integrity and equipment inventory
- Increase performance
- Waste reduction
- Increase quality
- Employees engagement

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about visual management

5S principles

5S is designed to decrease waste while optimizing productivity through maintaining an orderly workplace and using visual cues to attain more consistent operational results. 5S refers to five steps – sort, set in order, shine, standardize and sustain (also known as the 5 pillars of a visual workplace).

What A2Z can do for you...

- 5S audits
- Employees trainings
- 5S workplace standardization
- 5S templates and tools
- KPI setup
- Workplace simplification

Benefits of 5S:

- Incidents reduction
- Increase performance
- Waste reduction
- Increase quality
- Employees engagement

Before implementing 5S

After implementing 5S

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about 5S

Yard management

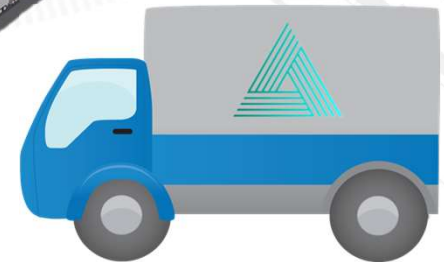

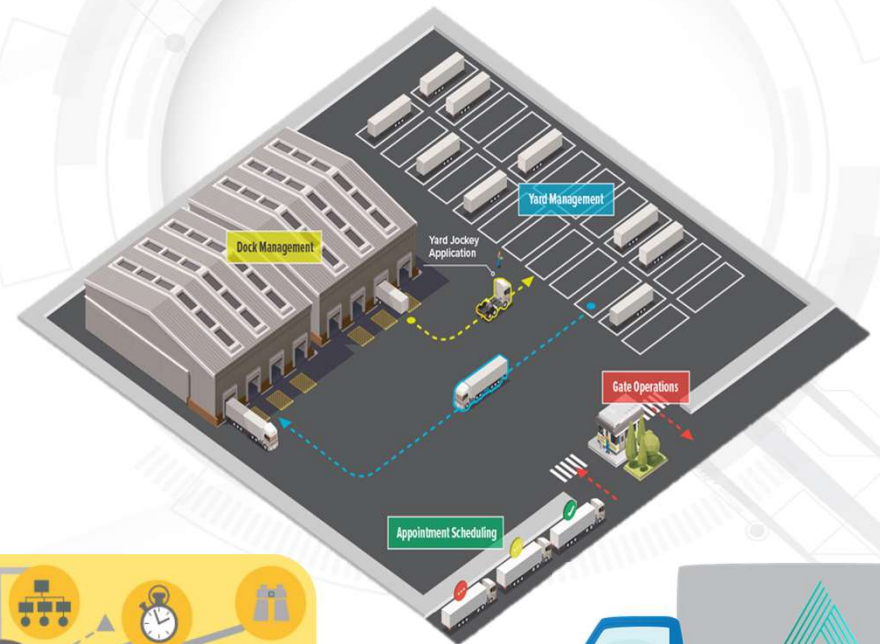

Yard Management involves the scheduling, coordinating, and directing of assets, such as inbound and outbound trucks, trailers, shipments, personnel, and more, within the dock and yard of a facility.

What A2Z can do for you...

- Yard management process creation
- Vehicle tracking and monitoring
- Customized software development
- Yard optimization
- Yard design and layout
- Loading and unloading management

Benefits of yard management:

- Incidents reduction
- Increase stock integrity
- Increase efficiency
- Waste reduction
- Demurrage costs avoidance
- Real-time data

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about Yard Management

Stock integrity solutions

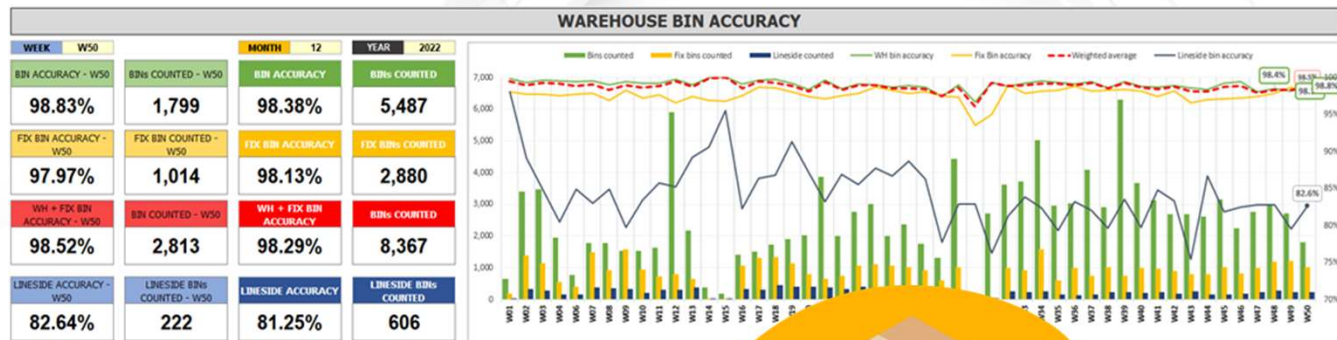

Stock accumulation and storage is important because, firstly, having stock avoids any shortage in the product the company works with; secondly, the more units, the lower the unit cost of the product in general; and thirdly, having the product stored enables immediate availability to meet the customer's demand.

What A2Z can do for you...

- ABC, FIFO, FEFO techniques
- Minimum stock analysis
- Value stream mapping
- Stock forecasting
- Cycle counts
- Handle excess inventory

Benefits of stock integrity:

- Increase performance
- Cost reduction
- Waste reduction
- Quality increase
- Improved forecasting
- Better product life cycle
- Storage expenses

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about stock integrity

Personnel Visibility

One of the reasons why the attendance management system is important is because it helps employers to check the overall performance of the employee. Using the timesheet, the employer will be able to check when the employee arrives and leaves. Also, the total hours the employee gave to the company on a daily basis.

What A2Z can do for you...

- Headcount overview
- Recruitment visibility
- Employees requests (holiday, home office..)
- Sickness overview
- Attrition reason codes
- Promotions/Demotions
- All requirements for further development could be addressed

Benefits of personnel visibility:

- Increase efficiency
- Cost reduction
- Attrition reduction
- Operation visibility
- Mobile access

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about personnel visibility

Continuous improvement

- Internal operations audits
- Lean organization
- VSM, Bottleneck analysis
- Process Waste determination
- Storage utilization
- Trend analysis
- Layout optimization
- Packaging utilization
- Material flow utilization

Internal operations audits

A review focused on the internal controls of operations processes, procedures and systems. Target is to increase productivity, as well as efficiency and effectiveness of the operation. This process is a kick-off step prior any improvement.

What A2Z can do for you...

- Conduct a detailed site tour
- Identifying and recording waste in processes and work areas
- Waste elimination identification
- Improvement solutions proposal and implementation support
- Identification of risks – delivery, cost, quality, health&safety

Benefits of internal operations audits:

- Cost reductions
- Increase efficiency
- Improved forecasting
- Increased transparency
- Accountability
- Better decision making

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about operations audits

Lean organization

The core principle in implementing lean manufacturing is to eliminate waste to continually improve processes. By reducing waste to deliver process improvements, lean manufacturing sustainably delivers value to the customer.

What A2Z can do for you...

- Internal operations audits
- Lean assessment
- Organization chart review
- Workload analysis
- Kaizen events and personal trainings
- Employee effectiveness analysis
- Fresh eye operations overview

Benefits of lean organization:

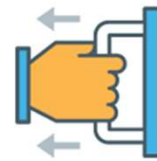

- Cost reductions / Quality increase
- Increase efficiency and flexibility
- Improved forecasting
- Transparency
- Accountability / Sustainability

VALUE

VALUE STREAM

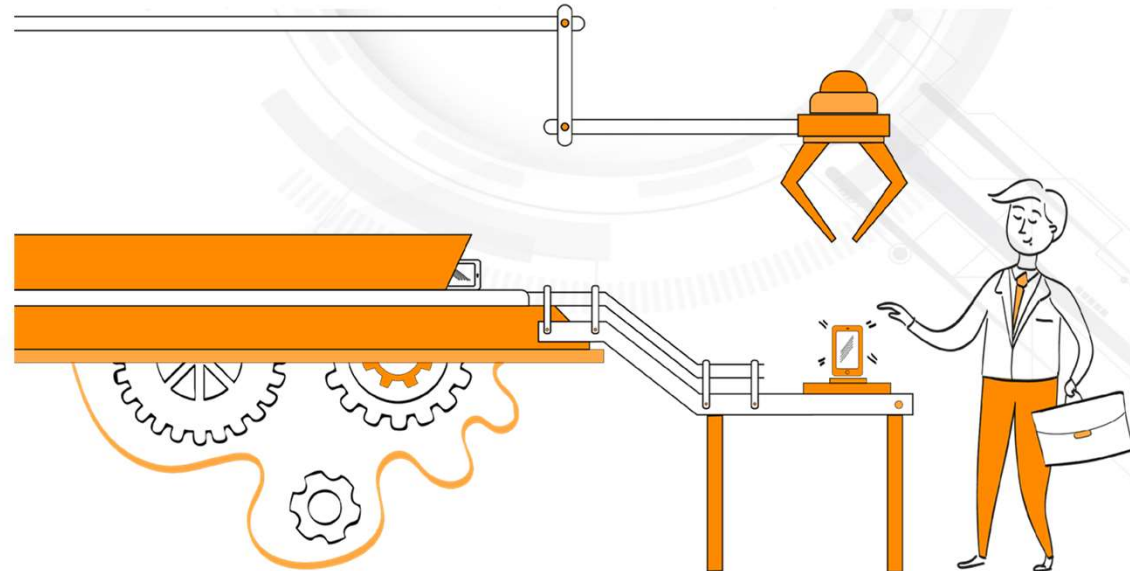

PULL

FLOW

PERFECTION

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about Lean

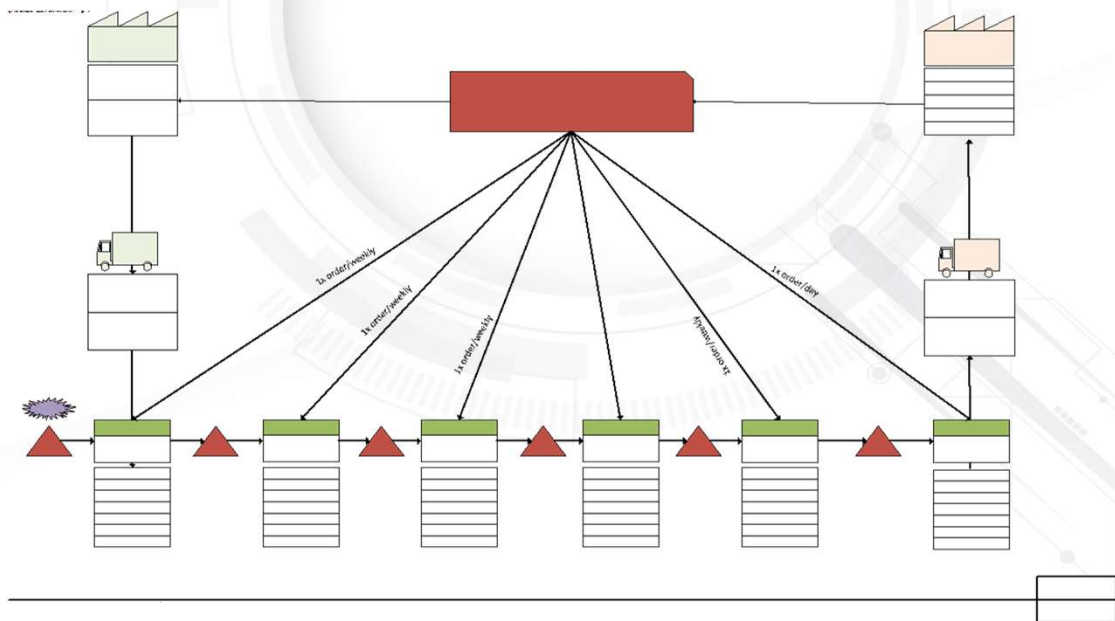

Value stream mapping (VSM) is defined as a lean tool that employs a flowchart documenting every step in the process. VSM as a fundamental tool to identify waste, reduce process cycle times, and implement process improvement.

What A2Z can do for you...

- Preparation and digitization of processes
- SIPOC analysis
- YAMAZUMI analysis
- Bottleneck analysis
- Value stream mapping

Benefits of VSM, Bottleneck analysis:

- Workflow digitalization
- Quick waste determination
- Operations impact visibility
- Cost reduction – efficiency increase
- Customer satisfaction
- Increased transparency

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about VSM

Storage utilization

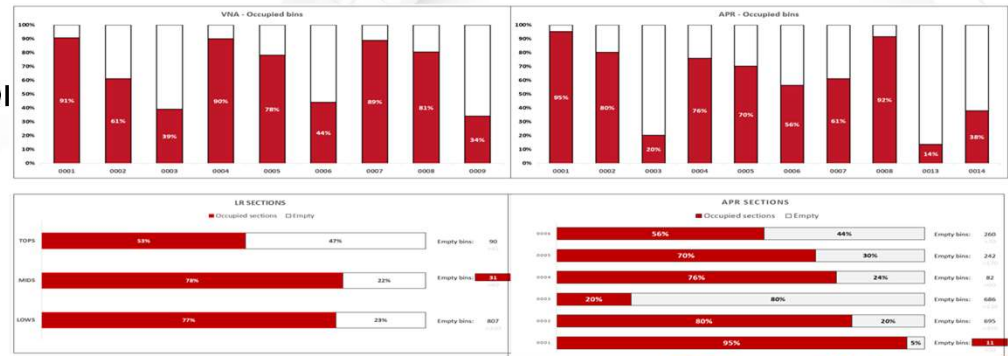

Measure of how well is your available storage space is used and organized. Keep your inventory low and reflect your demands. Reduced inventory saves your business carrying costs, storage costs, and transportation costs between warehouse facilities.

What A2Z can do for you...

- Stock occupancy analysis – space optimization
- Storage analysis
- Inventory management
- Material distribution
- Excess stock monitoring
- ABC analysis for put-away strategy
- Material handling equipment analysis
- Storage usage KPI creation

Benefits from improved stock utilization:

- Better space utilization
- Better inventory management
- Improved FIFO/FEFO

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about storage utilization

Trend analysis

Trend analysis is the process of comparing business data over time to identify any consistent results or trends. You can then develop a strategy to respond to these trends in line with your business goals. Trend analysis helps you understand how your business has performed and predict where current business operations and practices will take you.

What A2Z can do for you...

- Identifying areas where your business is performing well so you can duplicate success
- Identifying areas where your business is underperforming
- Providing data to support your decisions
- Providing historical data to analyse trends and improve your business
- Predictive modeling

Benefits of trend analysis:

- Predictive capabilities
- Process improvement
- Data gathering
- Data based decision-making
- Profitability increase

Ask us about:

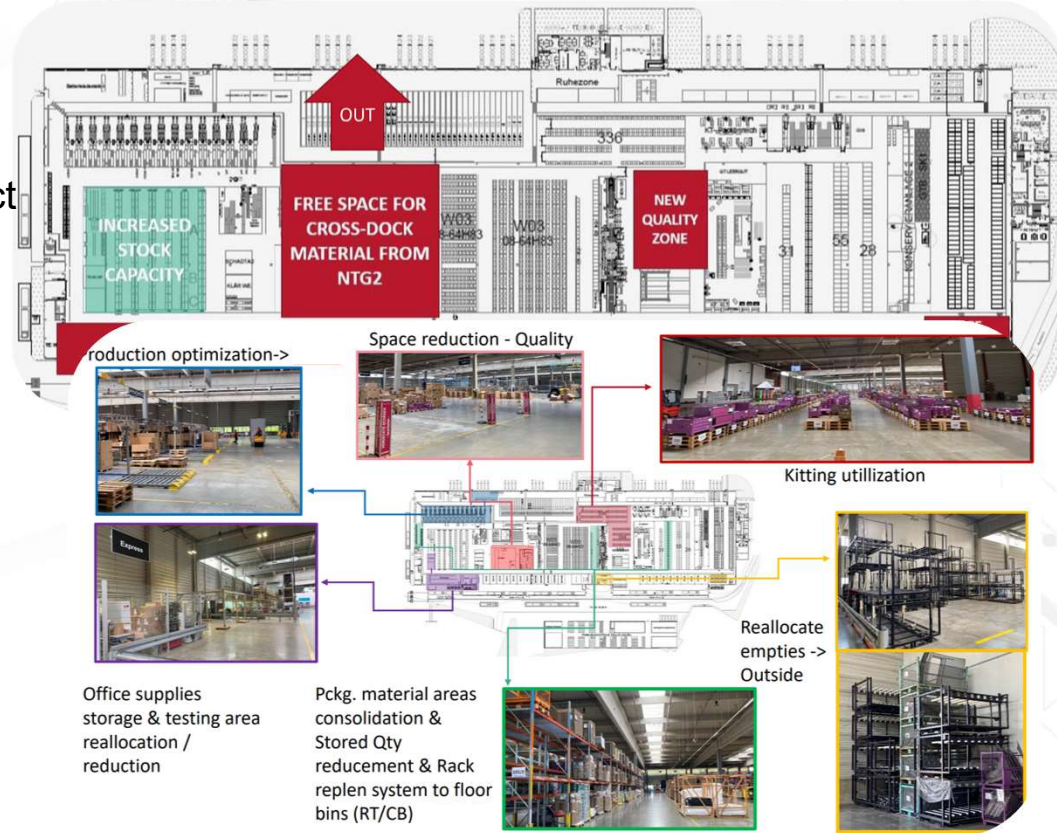

1. Feasibility analysis
2. Added value & Return of investment
3. More information about trend analysis

Layout optimization

Well prepared layout is foundation of unnecessary movements and HSE risk elimination. We provide operations, office areas digital visualizations or complete layout solutions. Layout optimization refers to the process of designing and organizing the layout of a facility, such as a warehouse or manufacturing plant, to optimize the use of space and improve efficiency.

What A2Z can do for you...

- Layout preparation for individual areas
- Layout creation in selected software (CAD, Visio...)
- Current layout optimization according to material flow
- Layout safety standards – employee/machinery contact
- Process flow analysis
- Space optimization

Benefits of process layout optimizations:

- Traffic reduction
- HSE risk reduction
- Material flow optimizations
- Better space utilization
- Space cost savings
- Productivity increase

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about layouts

Packaging utilization

Packaging has important functions like containment, protection, convenience and communication. Within those you need best possible utilization to ensure fluent material flow and cost reduction.

What A2Z can do for you...

- Review items against usage (ABC analysis) to reflect insufficient packagings
- Review packaging density and identify increase possibilities
- Review material damage rate
- Prepare new packaging solutions

Benefits of packaging utilization:

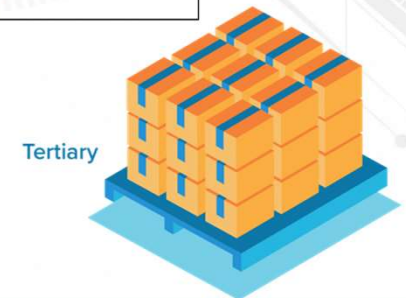

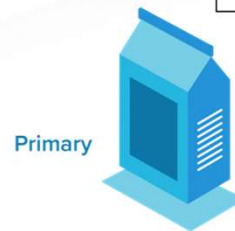

- Packaging density increase
- Transport costs
- Storage occupancy decrease
- Put-away/Pick reductions
- Productivity increase

Current Packaging Details - Individual Container			
1	Packaging Type (Special or Standard)	Standard	
2	Container Code	KL.T6429	
3	Pieces per container (not layer or cube)	8	
4	Length	60	cm
5	Width	40	cm
6	Height	28	cm
7	Tare Weight - container only	2,9	kg

Photo of Packaging:

New Packaging Proposal Details - Individual Container			
1	Packaging Type (Special or Standard)	Standard	
2	Container Code	KL.T6429	
3	Pieces per container (not layer or cube)	13	
4	Length	60	cm
5	Width	40	cm
6	Height	28	cm
7	Tare Weight - container only	2,9	kg

Photo of Packaging:

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about packagings

Material flow utilization

Material flow controls the destination of goods movements from the goods entry, to warehousing, picking and shipping. To ensure highest efficiency material flow needs to reflect customer demand as it's coordinates and optimizes the sequence of work steps and controls the order processing in live operation.

What A2Z can do for you...

- Review and identify material flow bottleneck
- Review material flow against layout
- Storage utilization according customer demands
- Traffic routing solutions
- Material flow simplification
- Material putaway strategy

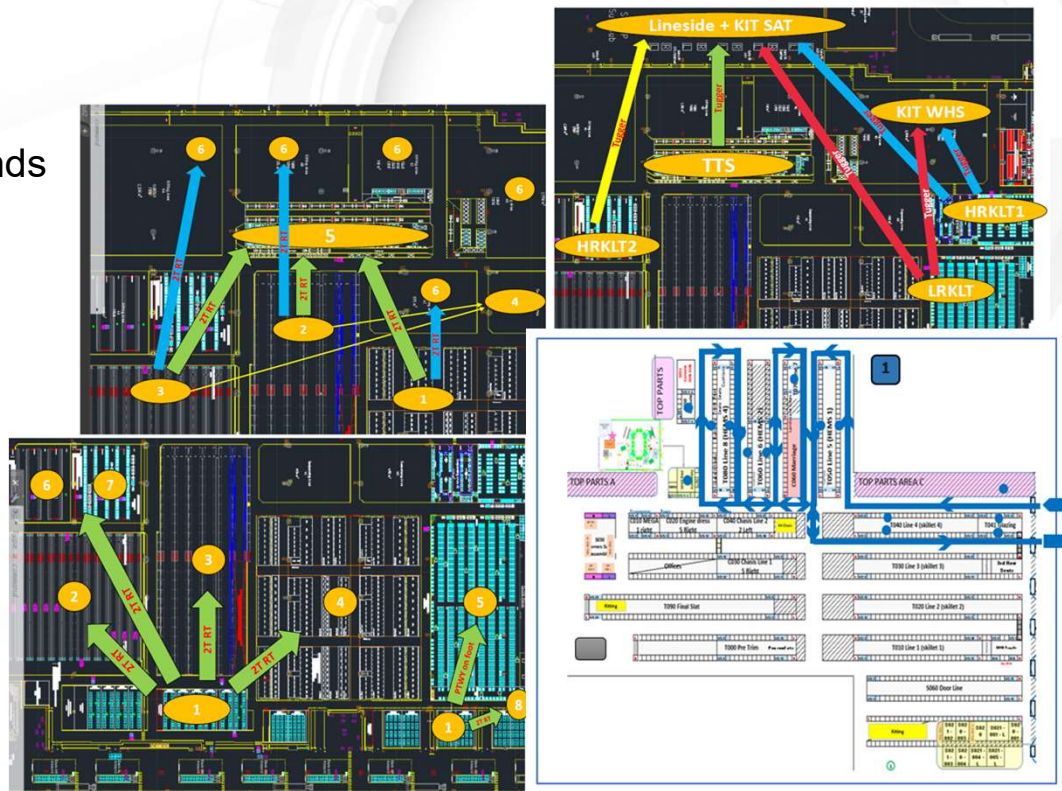

Benefits of process layout optimizations:

- Streamline material flow
- Promote sustainability
- Mitigate operating costs
- Process simplification and effectivity increase
- Reduce order turnaround time
- Increase overall profitability

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about material flow

Operations excellence

- Automotive standards implementation
- Problem solving tools
- SOP creation
- HSE risk analysis
- Change control management
- Non conformance elimination
- Crisis management
- Personnel trainings

Automotive standards implementation

The Toyota Production System (TPS) is an integrated socio-technical system developed by Toyota (automotive manufacturer) to efficiently organize manufacturing and logistics, including the interaction with suppliers and customers, to minimize cost and waste.

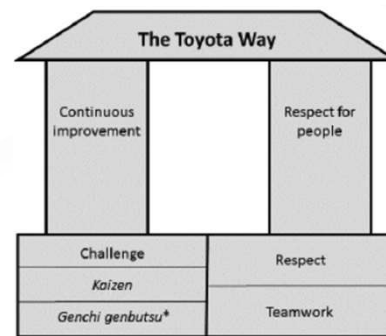

What A2Z can do for you...

Support with implementation of:

- Andon
- Gemba, Genchi Genbutsu
- Heijunka
- Jidoka
- Just-in-time
- Kaizen
- Level loading
- Kanban
- Supermarket
- Muda, Mura, Muri
- Obeya
- Poka-yoke (error proofing)
- 5S
- Value Stream Mapping
- SMED
- 5 Why's

Benefits of implementation automotive standards:

- Streamline material flow
- Promote sustainability
- Mitigate operating costs
- Increase the accuracy of inventories
- Cost-effective inventory investments
- Reduce order turnaround time
- Increase revenue
- Improve customer service
- Increase overall profitability

*Japanese term for 'go and see for yourself'

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about automotive standards

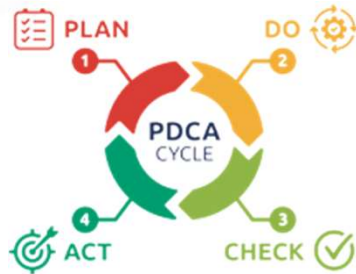

Problem solving tools

Problem-solving methods are primarily designed to help a group or team through a process of first identifying problems and challenges, ideating possible solutions, and then evaluating the most suitable. Finding effective solutions to complex problems isn't easy, but by using the right process and techniques, you can help your team be more efficient in the process.

What A2Z can do for you...

- Identify and analyze problem
- Find out the solution
- Implement the solution
- Monitoring and evaluation of solution
- Create your own tools and templates
- Failure mode and effects analysis
- Provide training to your teams

Benefits of problem solving:

- Creativity and teamwork
- Research and analysis
- Intelligence
- Risk management
- Decision making
- Active listening
- Improved communication

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about problem solving tools

SOP creation

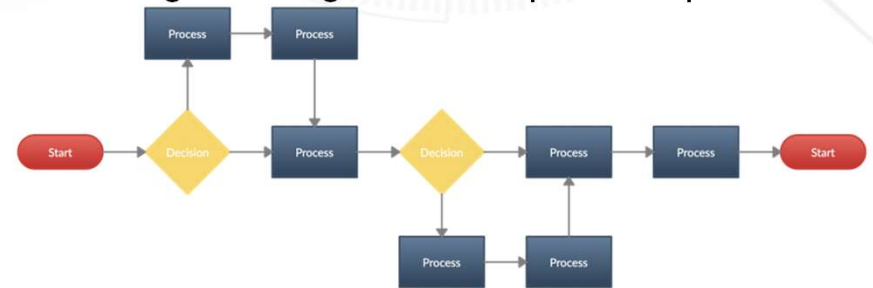

Standard operating procedure (SOP) is a procedure specific to your operation that describes the activities necessary to complete tasks in accordance with industry regulations, laws or own standards.

What A2Z can do for you...

- Systemize and document all processes
- Create and implement SOP
- Provide SOP template
- SOP digitalization
- SOP standard naming convention
- SOP archiving

Benefits of SOP:

- Efficiencies and therefore profitability
- Consistency and reliability in production and service
- Fewer errors in all areas
- Way to resolve conflicts between partners
- Healthy and safe environment
- Protection of employers in areas of potential liability and personnel matters
- Roadmap for how to resolve issues
- First line of defense in any inspection, whether it be by a regulatory body, a partner or potential partner, a client, or a firm conducting due diligence for a possible purchase

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about SOP

HSE risk analysis

HSE (Health, Safety, and Environment) analysis and audit refers to the process of evaluating and assessing an organization's compliance with health, safety, and environmental regulations and standards

What A2Z can do for you...

- Business area HSE audit
- Identifying the hazards
- Assessing the risks presented by these hazards
- Putting control measures in place
- Incidents report templates (Internal / External)

Benefits of HSE risk analysis:

- Injury avoidance
- Property and material damage avoidance
- Safe work environment
- Compliance
- Employee engagement
- Legal protection
- Brand protection

Ask us about:

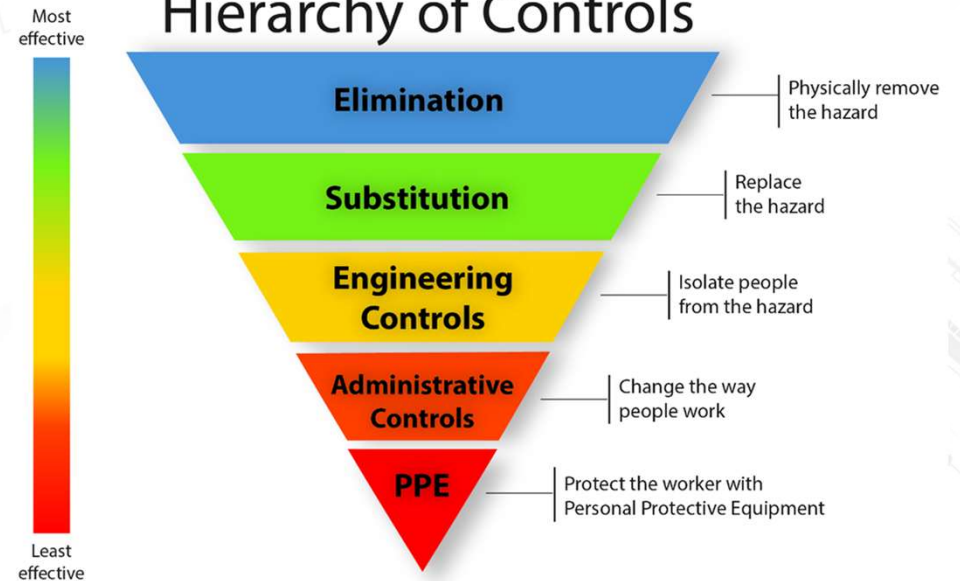

1. Feasibility analysis
2. Added value & Return of investment
3. More information about HSE risk

WORK SAFETY

Hierarchy of Controls

Change control management

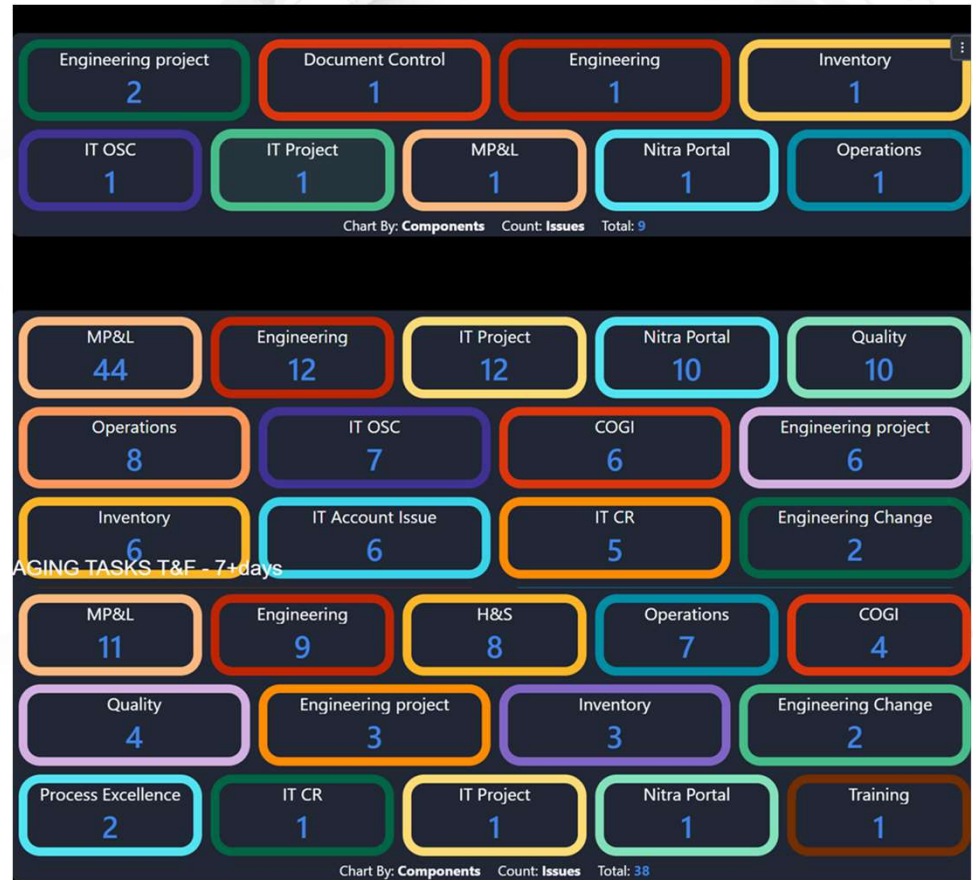

Change control is a process used to ensure that changes to a product, system, internal or external processes are introduced in a controlled and coordinated manner. It reduces the possibility that unnecessary changes or faults will be introduced to a system without forethought.

What A2Z can do for you...

- Change control software implementation
- Initiation of a change request
- Change request evaluation
- Change management strategy
- RACI matrix
- Change implementation
- Decrease change resistance
- Closure of change request

Benefits of change control:

- Improved productivity
- Collaborative teamwork
- Effective change communication
- Decreased cost of change

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about change control

Non conformance elimination

Non-conformance (or nonconformity/non conformance) means that something went wrong with a process, service, or product, and the result does not match the initial specifications.

What A2Z can do for you...

- Review the detected non-conformity
- Determine the cause(s) of the non-conformity
- Evaluate the need to prevent its recurrence
- Determine the necessary corrective action
- Take action appropriate to the effects of the non-conformity
- Record the results of the action taken
- Review the effectiveness of the action taken

Benefits of non conformance elimination:

- Reduction in the occurrence and costly impact of nonconformances in terms of reputation, cost and resources
- Improvements to product/service and resultant customer satisfaction
- Efficient use of resources.
- Reduction in number of customer complaints
- Improved QMS effectiveness

Why are organizations having such a hard time taking effective corrective action? It may be that they don't understand how to perform root cause analysis, or they may view a corrective action request as an annoyance to be quickly dismissed so they can get back to their "real" work.

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about non conformance

A common mistake in completing a corrective action is for the auditee to claim that the cause of a nonconformity was human error. As a result, the organization attempts to correct the behavior of the person it blames for the problem instead of eliminating the real root cause.

Crisis management

This methodology brings together a set of strategies and actions aimed at minimizing, reducing, or reversing the possible consequences of these problems, which can range from economic to those related to the organization's image.

What A2Z can do for you...

- Map the company's risks
- Create and support crisis committee
- Strategy elaboration
- Contingency plan to manage a crisis
- Raise awareness of importance of internal communication

Benefits of crisis management:

- Stabilization of workplace
- Cost avoidance
- Stock integrity increase
- Safety increase
- Employees engagement
- Customer satisfaction

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about crisis management

Providing training and development to employees allows employers to pinpoint the knowledge and skills they want their employees to have. Training and development programs can educate employees about new skills or provide updates on existing skills to enhance productivity.

What A2Z can do for you...

We provide course study materials to better understand the concepts of healthy process, material flow, layouts, headcount projection, problem solving and a lot of more...

- Classroom or group trainings
- Course study materials designed by subject matter experts
- Mock tests to prepare in a best way
- Highly qualified and expert trainers with vast experience
- Course completion certificate
- End-to-end support via phone, mail, and chat
- Real life and Industry specific explanation
- Industry best practices and case studies and present trends
- Course material adhered with International standards
- Convenient weekday / weekend training course schedule in Slovakia

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about trainings

Engineering solutions

- Project management
- RFQ preparation
- Headcount projection
- Reverse logistics solutions
- WH traffic management
- Green field projects
- Ergonomics studies and analysis

RFQ preparation

 **Request for Information (RFI)** - general information about prospective suppliers' capabilities and services/goods.
Request for Quotation (RFQ) - suppliers' pricing on the requested services.
Request for Proposal (RFP) - comprehensive overview of suppliers' company background, detailed descriptions of the requested products/services.

What A2Z can do for you...

- RFI, RFQ, RFP engagement
- Preparation of RFI, RFQ, RFP documentation
 1. **Professional Cover Page**
 - » First impressions are everything
 2. **Table of Contents**
 - » Provide your audience with an understandable and easy-to-read overview
 3. **Company Background and Overview**
 - » A cover letter and executive summary are also appreciated elements during the bid process.
 4. **Comprehensive Product Descriptions**
 - » An all-inclusive, detailed overview of the requested product or service should completely exhaust questions.
 5. **Implementation Plan**
 - » The implementation plan includes your company's step-by-step timeline for new client onboarding.
 6. **Financial Review**
 - » Be prepared to detail up to two (2) to three (3) years of your company's financial information.
 7. **Referrals**
 - » Before entering the RFP, RFQ or RFI submittal process, it's wise to have three-four client referrals or testimonials on-hand.
 8. **Pricing Outline**
 - » Having a standard pricing sheet for products/services will make it easy

Benefits of RFQ preparation:

- Increase chance with other competitors
- Quicker RFQ preparation
- Increased data accuracy
- BAU team is not overloaded

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about RFQ

Headcount projection

Headcount projection is a method using set of tools to determine right amount of workforce for individual tasks, steps in process or complex processes.

What A2Z can do for you...

- Continuous time studies
 - » Working operation - time study
 - » Working day - time study
 - » Bilateral observation
 - » REFA
- Statistical methods
 - » Moments observation
 - » Multimoments multidimensional observation
- Predefined time standards
 - » MTM1
 - » MTM2
 - » MTM3
 - » MTM UAS
 - » MOST
 - » MODAPTS

Benefits of headcount projection:

- Accurate headcount to reflect operations needs
- Work standardizations
- Employees experience level visibility
- Workload gap analysis
- No actual operation required to calculate HC
- Easy volume changes HC adaptation
- Increase process of stability
- Determining right amount of time for individual process steps

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about HC projection

Reverse logistics solutions

Reverse logistics is the process of implementing, controlling, and planning the cost-effective flow of finished goods, raw materials, and in-process inventory. The flow is from the point of consumption (i.e. the customer) to the point of origin (i.e. the manufacturer), to properly dispose of these or to recapture value.

What A2Z can do for you...

- Return of goods by customers
- Return of unsold goods
- Reuse of packaging
- Refurbishment of goods
- Repairs and maintenance
- Re-manufacturing of goods
- Selling of goods to a secondary market
- Recycling and disposal of end-of-life goods

Benefits of reverse logistics solutions:

Streamlined reverse logistics processes allow reductions in various cost areas:

- Storage costs
- Transportation / return shipping costs for both delivery and returns
- Returns labor, including processing, credit reconciliation, technical support, and vendor management
- Costs associated with fraudulent returns

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about reverse logistics

WHS traffic management

Traffic management involves the safe movement of vehicles (such as cars, trucks and buses), mobile powered plant (such as forklifts) and pedestrians within, through and around sites where work is carried out.

What A2Z can do for you...

- Conduct a detailed site tour identifying and recording traffic processes and work areas
- Review of relevant documented traffic management systems and procedures in place
- A risk assessment which determine:
 - » How severe a risk is
 - » Whether existing control measures are effective
 - » What action you should take to control the risk
 - » How urgently the action needs to be taken
- Based on the findings of the identification of Traffic Hazards and assessment of the risks a Traffic Management Plan shall be developed which includes:
 - » the desired flow of pedestrian and vehicle movements
 - » the expected frequency of interaction of vehicles and pedestrians
 - » illustrations of the layout of barriers, walkways, signs and general arrangements to warn and guide traffic around, past, or through a work site or temporary hazard
 - » how short term, mobile work and complex traffic situations will be managed
 - » responsibilities of people managing traffic in the workplace
 - » responsibilities of people expected to interact with traffic in the workplace
 - » instructions or procedures for controlling traffic including in an emergency

Benefits of WHS traffic management:

- Injury risk avoidance
- Fluent MHE and pedestrian movements
- Property damage avoidance
- Quicker material delivery
- Process efficiency improvement
- Customer satisfaction
- Cost saving

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about WHS traffic mng.

Green field projects

Green field projects initial setup will affect future state of whole operation therefore must be precisely planned and executed. Proper planning avoid future costs for additional changes or modification.

What A2Z can do for you...

- Layout preparation
- Material flow and demands
- Racking and picking strategy
- MHE fleet calculation
- Manpower calculation
- Process creation/mapping
- Storage capacity calculation
- Management system setup
- Master data creation

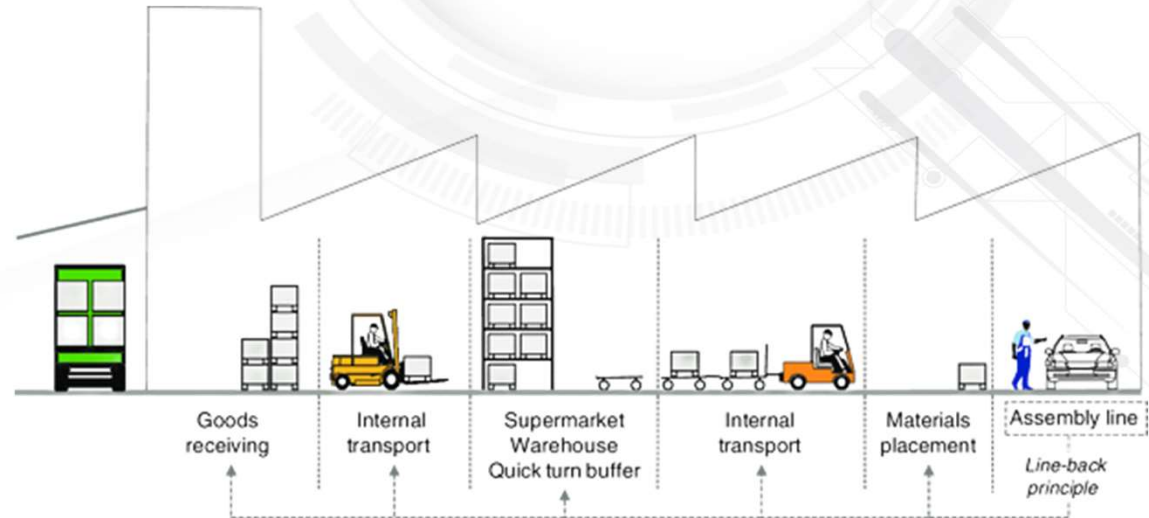

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about green fields

Benefits of cooperation:

- No actual running operation required for HC calculation
- Realistic timing
- Detailed process mapping
- Using right technology and machinery
- Fluent project implementation
- Cost saving

Ergonomics studies and analysis

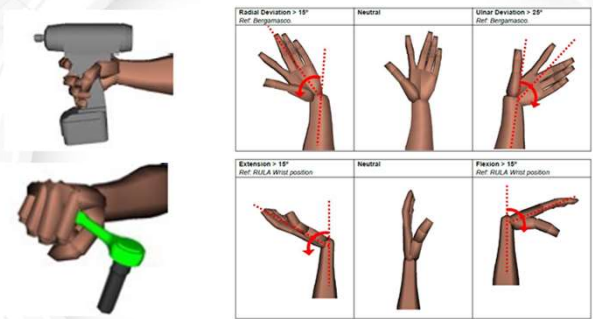

Ergonomics impact us all — whether we realize it or not. At its core, workplace ergonomics is about building a better workplace. When jobs are designed to match the capabilities of people, it results in better work being produced and a better experience for the person doing it. Ergonomics is about designing the work environment to optimize human well-being and overall system performance

What A2Z can do for you...

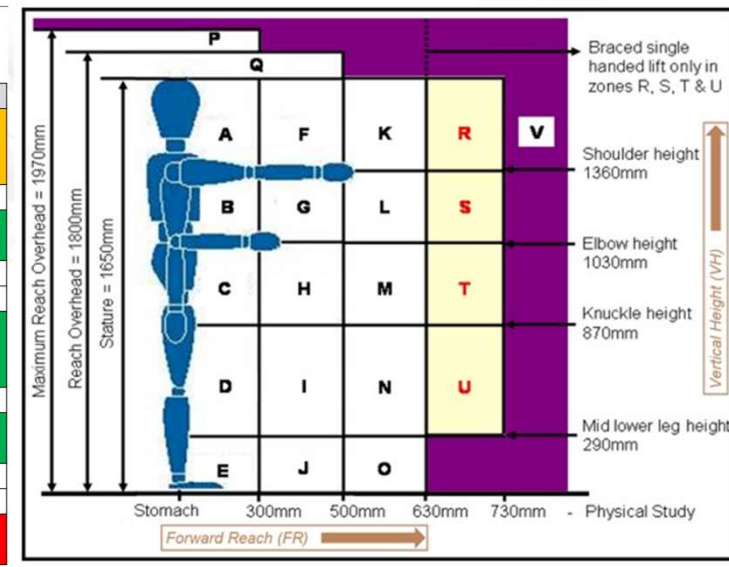

- Workplace assessment
- Employee assessment
- Job rotation plan
- Workplace modification
- Plan ergonomic improvements
- Measure progress
- Scale solutions

Benefits of Ergonomic analysis:

- Lower costs
- Higher productivity
- Better product quality
- Improved employee engagement
- Better safety culture

ECL Outcome		
Process NOK (Under Investigation)		
ASSESSMENT		SCORE
R	Within Detailed Analysis / Outside Zones	A
A	Within Less Preferred / Detailed Analysis.	
G	Within Most Preferred / Acceptable	
R	> 20 secs / > 5 per minute	G
G	< 20 secs / < 5 per minute	
R	Infeasible - hard clash with parts	G
A	Clash with parts but believe feasible	
G	Access / Clearance OK	
R	Awkward posture > 6 seconds	G
G	Posture OK	
R	Part weight exceeds guideline	R
G	Part weight below guideline	

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about Ergonomics

IT solutions

- Software optimizations
- Customized software development
- Smart applications
- Business intelligence systems
- Administration automatization

Software optimization

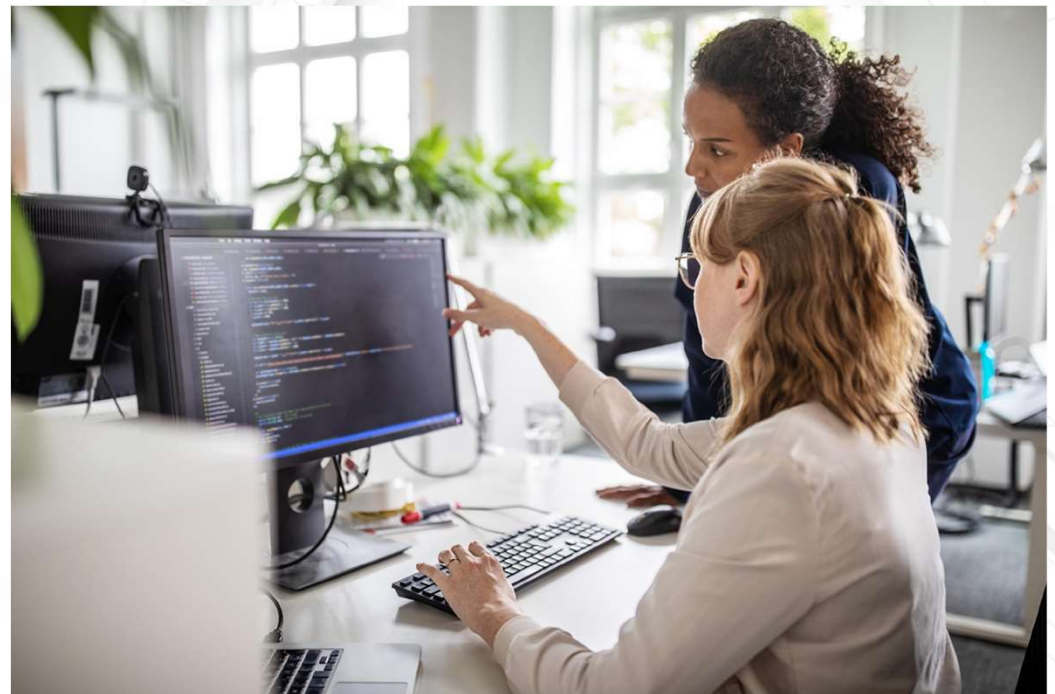

Software optimization, is the process of modifying a software system to make some aspect of it work more efficiently or use fewer resources. Aim is to increase your productivity without system development requirements

What A2Z can do for you...

- Software waste determination
- Performance tuning
- Material flow mapping
- System flow mapping
- Data flow management
- Process simplification
- Software IT review

Benefits of optimizing your software:

- Increase performance / safety
- Scalability
- Cost reduction
- Better material flow
- Increased system effectivity

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about software optimization

Customized software development / SMART applications

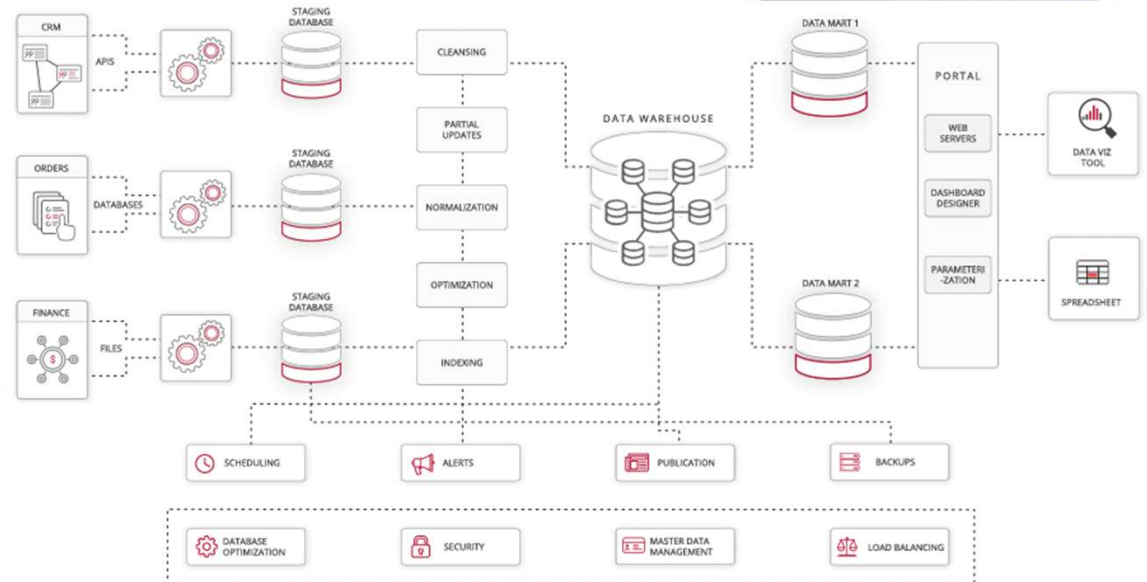

A software solution is basically a program that is designed to perform all the repetitive tasks that are time-consuming or for the regular tasks that are meant to be automated. Create automated workflows, connect to diverse data sources, visualize your data. If you need to quickly access or edit your data – Smart apps is what you looking for.

What A2Z can do for you...

- Precisely designed & developed Software
- Precisely designed & developed SMART apps
- Workflows development
- Data connections to different data sources
- On-key visualizations

Benefits of optimizing your software:

- Increase performance
- Cost reduction
- Better material flow
- Increased system effectivity
- Better customer service
- Mobile access

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about software development

Business intelligence systems

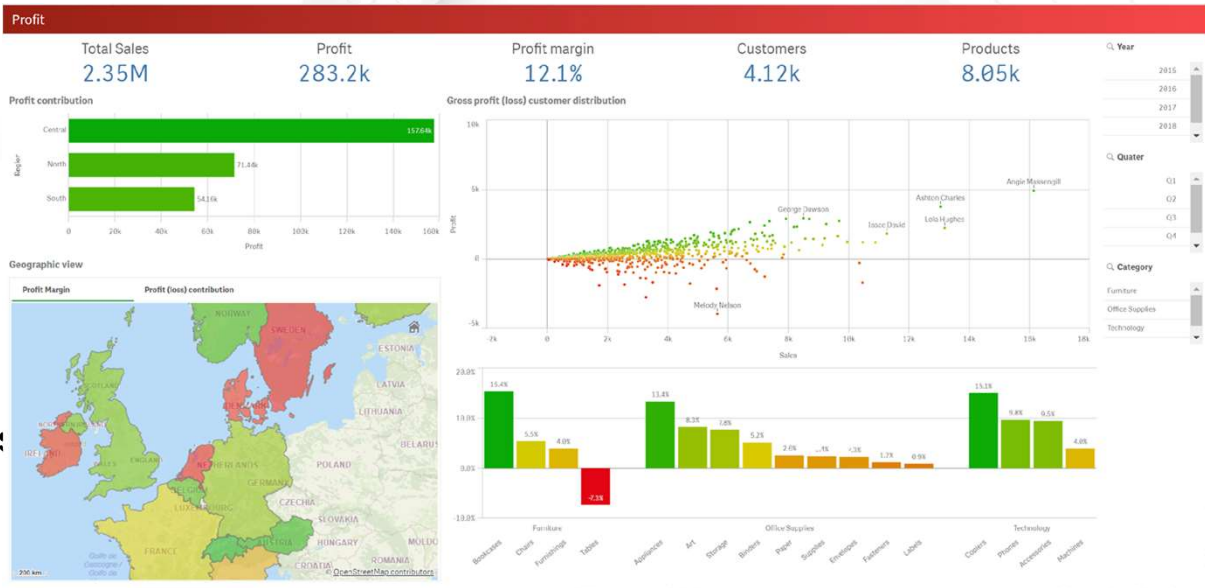

Business reports provide useful insights for management such as information on spending, profits and growth, operation health, system movements, KPI's and more however preparation takes valuable time of your team, therefore reporting automation could bring you benefits of reduced costs.

What A2Z can do for you...

- BI of your choice initial setup
- Microsoft office pack automation – VBA/Powershell/Power automate ...
- On-key design
- KPIs matrix selection
- Multi-level information

Benefits of reporting automation:

- Removal of manual data wrangling processes
- Frees up time for key members of staff
- Quick data accessibility
- Improved data accuracy and visualization
- Real-time data and scalability increase
- Better forecasting and predictive analytics

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about BI

Administration automation

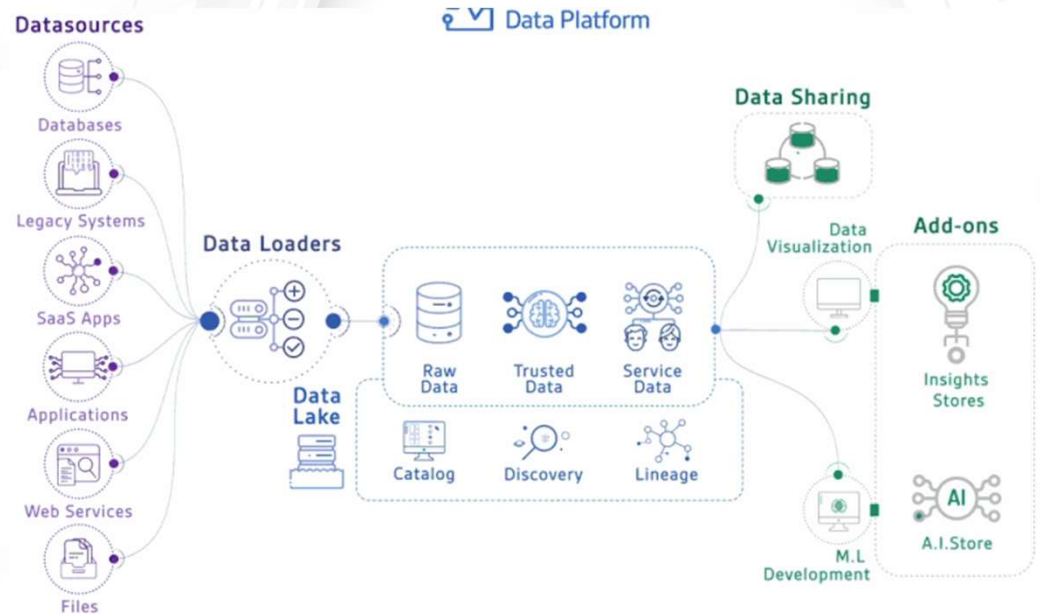

In every business organization, many tasks are monotonous and repetitive, and employee performing then becomes easily exhausted. A well-developed, custom software solution not only automates these activities but also saves up time and cost.

What A2Z can do for you...

- Process mapping
- Determination of repetitive tasks
- Risk analysis
- Automation of manual steps
- Automatic reporting
- Task scheduling implementation

Benefits of administration automation:

- Employees time utilization
- Cost savings
- Increased efficiency and accuracy
- Increased scalability
- Improved data management
- Greater flexibility

Ask us about:

1. Feasibility analysis
2. Added value & Return of investment
3. More information about automation

WEB development

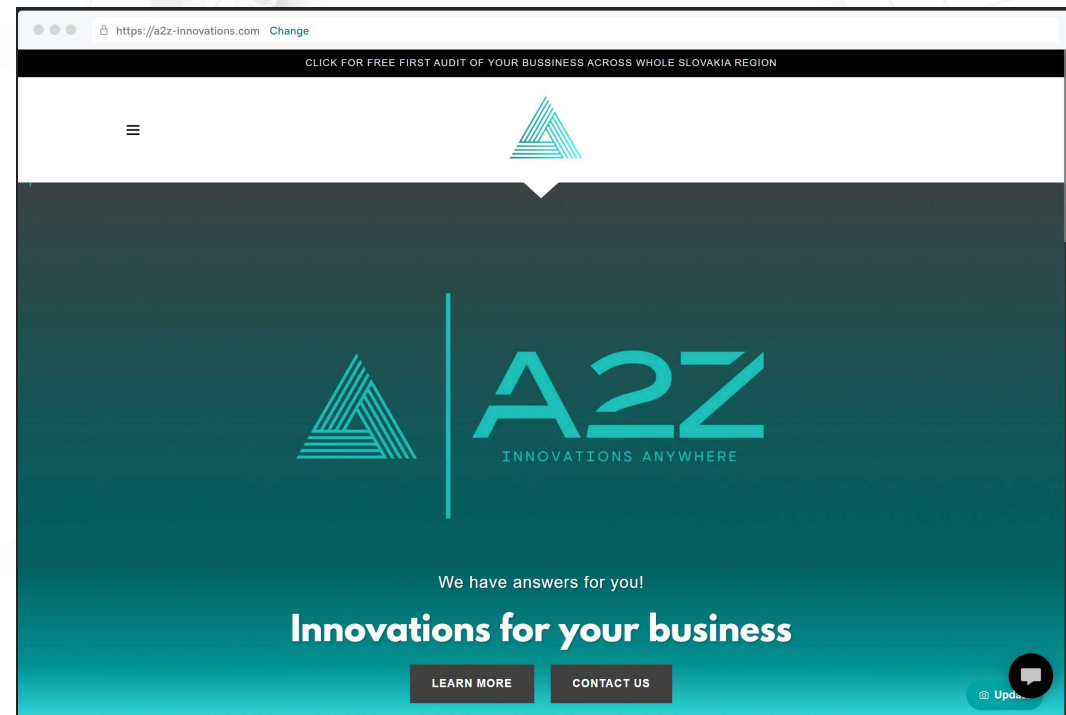

Boost your online presence with a professionally designed website that not only looks stunning but also delivers an exceptional user experience to convert visitors into customers.

What A2Z can do for you...

- Custom-built websites
- User-friendly and visually appealing websites
- Responsive websites that are compatible with all devices
- E-commerce websites
- Ongoing maintenance and support services
- Integration with third-party applications and tools
- Comprehensive website analytics
- Make your own domain and email addresses

Benefits of WEB development:

- A website enables businesses to be visible online
- Credibility
- Businesses full control over their online presence
- Expand a business's reach
- Hub for customer service
- Effective marketing tool,

Ask us about:

1. WEB development analysis
2. Added value & Return of investment
